

# Keep Your Data Secure

Your bank never emails your statement, right? **Because email is not secure.** Email data can be stolen as it travels unencrypted over the network and could be stored unencrypted on mail servers or Internet mail relays, as well as end devices.

Stolen data is sold on the dark web and used to illegally obtain loans or claim tax refunds in your name, **subjecting you to:**

- **Additional loan repayments**
- **Damaged credit history**
- **Tax fraud proceedings by the IRS**

Do not email sensitive documents. Upload at:
